The 2020 California Processing Tomato Harvest Update

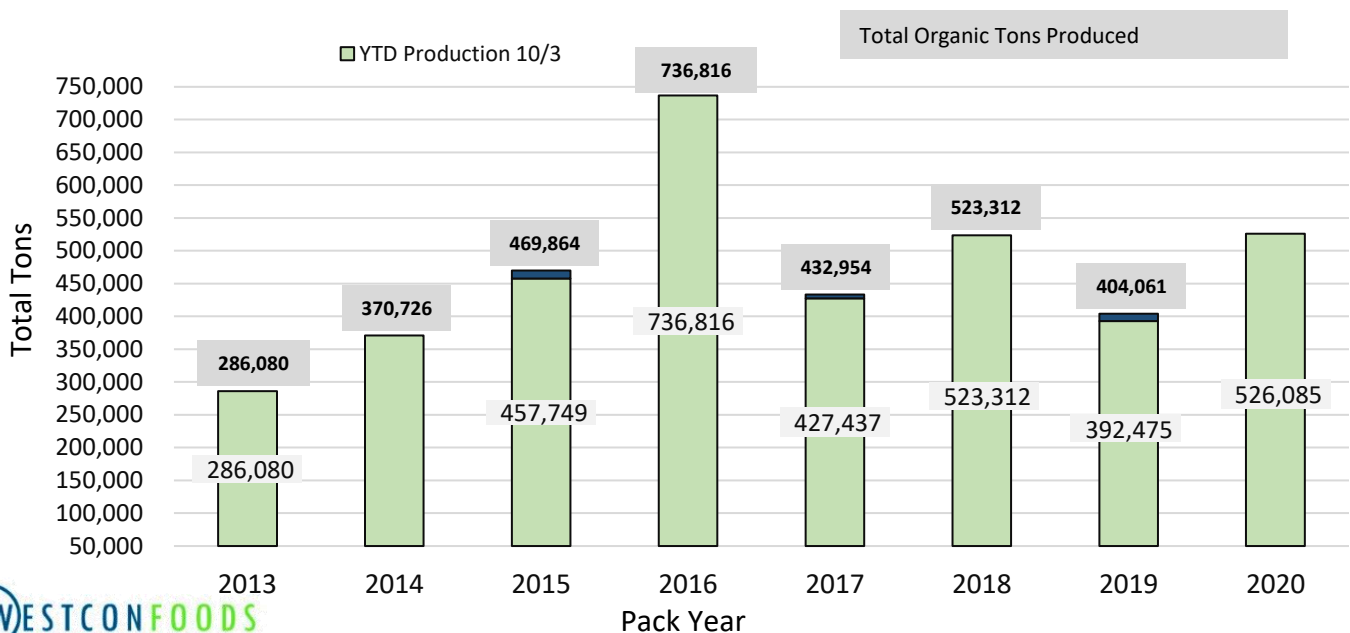

For the week ending October 3rd, California harvested 751,420 tons bringing the total tons harvest to 10,667,138 tons. The week ending October 10th is projected to be 479,047 tons. With the following week dropping to 130,514 tons (week ending 10/17) bringing the YTD total to 11,277,059 tons. The last remaining questions is how much will be produced for week ending 10/24. California will need 122,941 tons reach the 11.4 million-ton estimate.

Week 14 Projected Deliveries – October 10, 2020

2020 California Organic Tonnage

The 2020 California Organic Crop has come to completion with 526,085 tons. 2020 was the second largest organic crop on record, but suppliers are in a sold-out position.

The Weather Ahead

Warm weather is forecasted through the mid-week, with temperatures in the 90's again for mid October. The weather has cooperated in October by avoiding any late season rain.
