

CALIFORNIA TOMATO HARVEST UPDATE

Updated September 28, 2026

Week Ending September 19, 2026

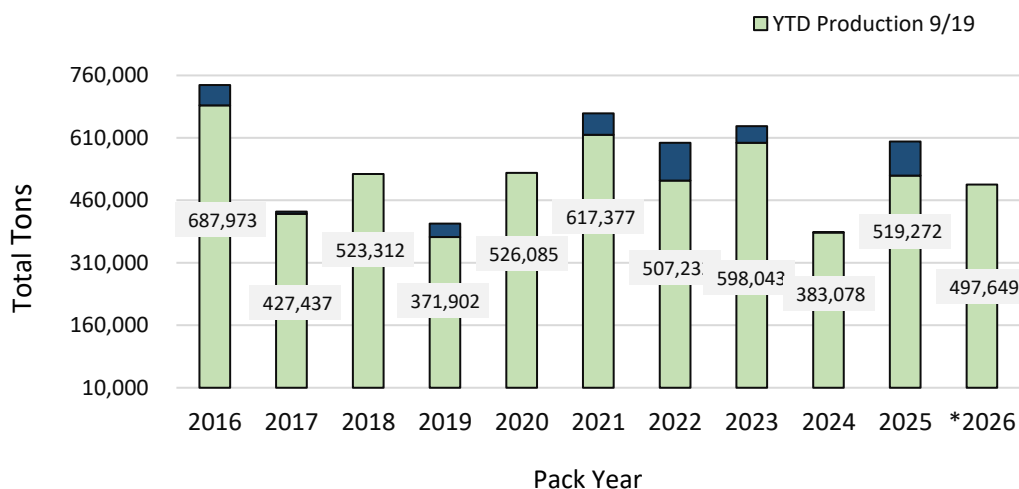

California's processing tomato harvest continues to advance.

PTAB reported **8,423,952 tons** delivered through the twelfth week (ending September 19). Weekly deliveries are projected to total **784,460 tons** for the week ending September 26 and **596,176 tons** for the week ending October 3, bringing the projected year-to-date total to **9,804,588 tons** by October 3.

2026 California Organic Tonnage

Through the week ending September 19, California processed **497,649 tons** of organic tomatoes.

Weather Outlook

Late-season heat is expected this week, with temperatures climbing into the upper 90s across much of California's primary processing tomato regions.
