

CALIFORNIA TOMATO HARVEST UPDATE

Updated September 8, 2026

Week Ending August 29, 2026

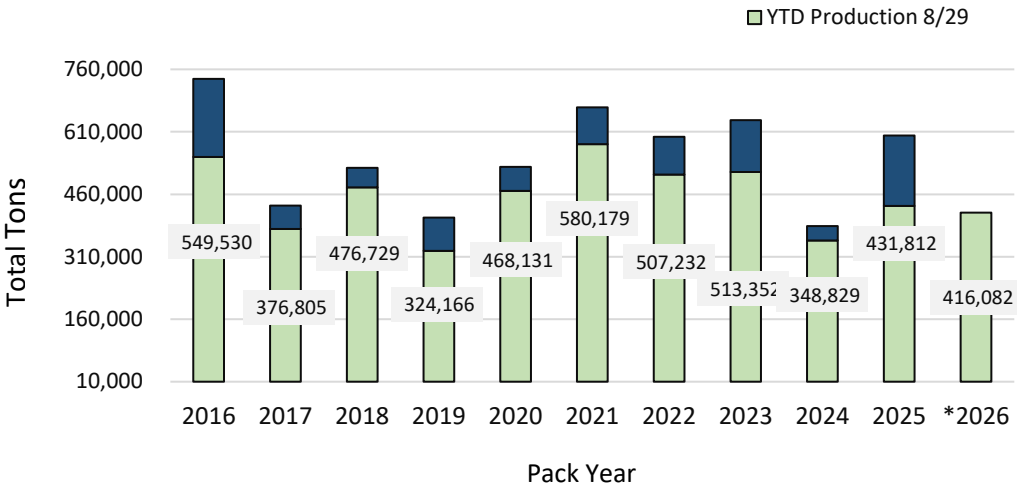

California's processing tomato harvest remains on a steady pace.

PTAB reported **5,754,435 tons** delivered through the ninth week (ending August 29). Weekly deliveries are projected to total **946,801 tons** for the week ending September 5 and **891,362 tons** for the week ending September 12, bringing the projected year-to-date total to **7,592,598 tons** by September 12.

2026 California Organic Tonnage

Through the week ending August 29, California processed **416,082 tons** of organic tomatoes.

Weather Outlook

A brief period of triple-digit heat is expected midweek, followed by noticeably cooler temperatures toward the weekend.

Location	9/7	9/8	9/9	9/10	9/11	9/12	9/13
