

CALIFORNIA TOMATO HARVEST UPDATE

Updated October 19, 2026

Week Ending October 10, 2026

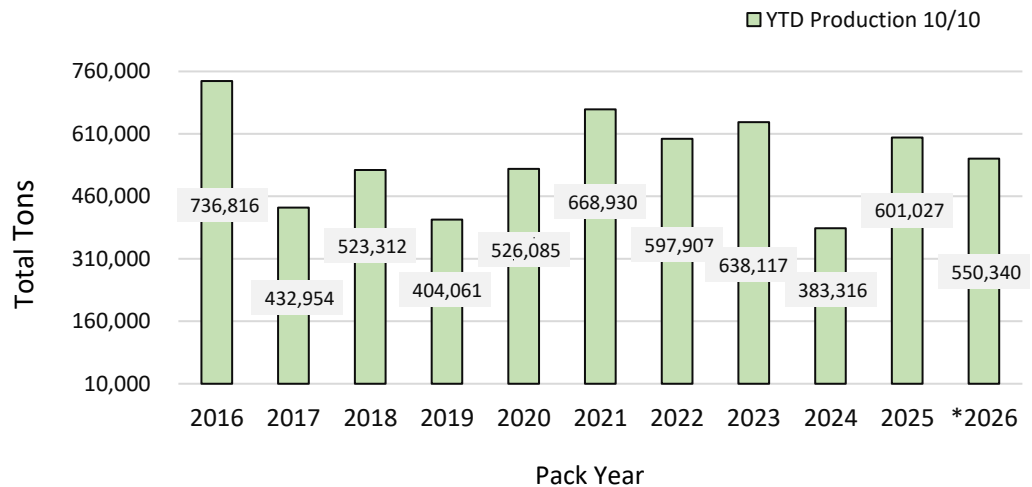

California's 2026 processing tomato harvest is drawing to a close.

PTAB reported **10,208,282 tons** delivered through the fifteenth week (ending October 10th). Weekly deliveries are projected to total **85,244 tons** for the week ending October 17 and **20,703 tons** for the week ending October 24, bringing the projected year-to-date total to **10,314,229 tons** by October 24.

2026 California Organic Tonnage

Through the week ending October 10th, California processed **550,340 tons** of organic tomatoes.

Weather Outlook

As California's 2026 tomato harvest nears completion, cooler temperatures and a chance of midweek rain are expected, followed by warmer conditions toward the weekend.

Location	10/19	10/20	10/21	10/22	10/23	10/24	10/25
